

**IVSHydro**

**IVS Hydro**, founded in 1972, is a multi-division, multi-million dollar national specialty service contractor. IVS, an extension of the manufacturing infrastructure of America, provides the services necessary for the conversion of natural resources into the energy and products that we consume.

**Our Customers** are a global "Who's Who" of metal, chemical, petrochemical, mining, energy, forestry, glass, plastic, transportation, refining and specialty gas producers. In addition, we provide services to a variety of local, municipal and federal government agencies. Our customers establish and require the highest standards of safety, performance and value. We routinely exceed our customer's expectations; that is why we still have our first customer.

**Our People** are second to none. We have some of the industries most experienced and highly trained professionals. Our employees average 10 years of specific industry experience each and our management average exceeds 20 years. People, serving people with an unyielding desire to improve the performance of our customers' operations.

**Our Vendors** provide an extension of our technical resources. Through strategic alliances, we are consistently able to introduce jointly engineered innovations that increase safety and improve our performance. We maintain one of the largest fleets of equipment in the industry. Our innovations and aggressive re-investment strategies drive us to constantly update and upgrade our equipment to provide the safest, most reliable and productive services possible.

## DIVISIONS

### Industrial Services

High-pressure and ultra-high pressure (UHP) hydro-wash and vacuum cleaning services.

- Metal (Cold) Cutting
- High Pressure Water Blasting
- Wet and Dry Vacuum Services
- Pipe Jetting and TV Inspection
- Coatings Removal (UHP)

### Chemical Cleaning

Deposit cleaning of process equipment through the circulation of chemical solutions.

- Solvent, Acid and Chelate Cleaning
- Circulating, Cascading and Foaming
- Pre-operational Cleaning
- Pickling and Passivation
- PH Neutralization

### Hydrodemolition

Computer controlled robotic high-pressure hydrodemolition of concrete surfaces.

- Bridge Decks
- Elevated Roadways
- Marine Piers
- Parking Structures
- Vertical Walls and Arches
- Warehouse Flooring
- Tunnels (360°)

### Environmental

Spill response, drilling, non-hazardous waste transportation and remediation services.

- Waste Management and Transportation
- Roll Off Placement and Transportation
- Sludge Densification (De-watering)
- Spill Response and Remediation
- Drilling Services

### Silo Services

Silo and bulk storage services through a wholly owned subsidiary Industrial SiloSource.

- Interior Cleaning
- Structural Inspection
- Repair Services
- Certified Engineering
- Construction
- Exterior Coatings Application
